• 1/3 cup raw pistach	nios, roughly chopped		
Instructions:			
		lamom pods in a small sauce	

- set aside to cool down.
- 2. While the coconut milk mixture is cooling down, drain and rinse the cashews and then place in a highspeed blender with the water. Blend until smooth. Then add the vanilla, orange blossom, mastic if using, and xanthum gum. Blend again then pour over the cooled coconut milk mixture. Taste to check if it needs more sweetness, keeping in mind it needs to taste a little too sweet at room temperature for it to taste just right once it s frozen.

 Once cold, pour into your ice cream machine, and let churn until almost solid. My machine takes about 10 minutes. At this point add the chopped pistachios and churn just until the pistachios are mixed in. Serve immediately or place in an airtight container in the freezer until ready to serve.
